

**HUNTINGTON'S DISEASE AWARENESS MONTH**

**MAY 2019**

**CAMPAIGN TOOLKIT**

[www.HDSA.org/LetsTalkAboutHD](http://www.HDSA.org/LetsTalkAboutHD)

## OVERVIEW

**#LetsTalkAboutHD** is a social media initiative during Huntington's Disease Awareness Month to encourage families to share their experiences with HD throughout the month of May.

Use **#LetsTalkAboutHD** to educate the world about the devastating impact that HD has on families.

You can post videos, photos or written stories – HD impacts every family differently and it's time the world talks about Huntington's disease!

This year you can submit your story by visiting [www.HDSA.org/MyHDStory](http://www.HDSA.org/MyHDStory).

### Campaign Goals

- Build HD awareness by encouraging people talk about HD on social media
- Engage people outside the HD community
- Inspire everyone to get involved with HDSA

## KEY MESSAGES

Below you will find key facts and messages about HD & HDSA

- Huntington's disease (HD) is a fatal genetic disorder that causes the progressive breakdown of nerve cells in the brain. It deteriorates a person's physical and mental abilities, usually during their prime working years, and has no cure ... yet.
- Every child of a parent with HD has a 50/50 chance of inheriting the faulty gene that causes Huntington's disease.
- Today, there are approximately 30,000 symptomatic Americans living with Huntington's disease and more than 200,000 at-risk of inheriting HD.
- The symptoms of Huntington's disease are described as having ALS, Parkinson's and Alzheimer's diseases – *simultaneously*.
- The Huntington's Disease Society of America (HDSA) was founded in 1967 by Marjorie Guthrie, the wife of legendary folk singer Woody Guthrie. Woody died from HD complications when he was only 55 years old, but the Guthrie family legacy lives on at HDSA to this day.
- In the battle against Huntington's disease no one fights alone. At HDSA, family is everything!
