

# Are you living with Huntington's Disease and have trouble sleeping?

This research study may be for you!

## Clinical Trials Study

We are looking for volunteers with the Huntington's disease (HD) gene to participate in a drug treatment study. The purpose of the study is to analyze how effective melatonin works at improving sleep quality in people with the HD gene.

**Time:** 9 weeks with 3 study visits and 2 phone interviews

## Are you Eligible?

- Verified HD mutation carriers 18-75 years old.
- Patients who report sleep disturbance.
- No change of medication during last 60 days.
- Must be able to consent.
- Must be able to make an informed decision.
- Not pregnant or nursing.
