

Do You See What I See?

Do individuals diagnosed with Huntington's Disease have similar or differing perceptions compared to their caregivers?

A Northeastern University Speech-Pathology Masters student thesis study is looking for...

- Individuals with a medical diagnosis of Huntington's Disease with a subsequent caregiver to take part in this study
- Participants with a cognitive capacity to listen and respond to questions

This Study includes:

- 15-minute information/consent phone call
- 30-minute zoom call (both participant and caregiver)
